EASY DESIGN SOLUTIONS PRIVATE LIMITED

Mobile Based Item Creation and Price Updations

www.easydesignsystems.com

Smart POS Solution

Increase your sales revenue by taking advantage of a pioneering solution

Focus on serving your customer, leave the rest to our EASY RESTO solution to manage your Inventory, Accounts, Ordering

Welcoming Your Guests

Wow your guests by providing them the following options. The following are some of the services that we can offer.

- Table Reservations in Advance
- e-Queue facility for Customers walking into crowded restaurants
- Cancellation/Modification facility for Reservation
- SMS facility for Reservation confirmation and Table Allocation

Take Orders In Multiple Ways! eCommerce/ **mCommerce Enabled!**

EASY RESTO supports the Ordering from Multiple Channel with features like...

This feature enables the ordering by the customer at the outlet through POS Device / Tablet or through the

Self Ordering Tablet at the Table...

Integration of Phone order on the POS Device

Calls from customers are integrated through Telephone Interface on the POS Device enabling the call order taking a seamless process.

Online Ordering through Portals / Mobile Apps

Online Ordering enables the customers to order the food and service through the internet portal or through dedicated mobile apps that is integrated backward with the restaurant and ensures speedy execution of orders.

Manage Your Kitchen Effortlessly & Accurately

EASY RESTO provides with options that automate almost all the back end operations of the restaurants like recipe management, material requirement planning, Stock indenting, production allocation and managing. Here are some key that we features supported by kitchen management:

- Recipe Management Order Planning for Raw Material
- Auto Intent Generation based on Material Plan Recipe based Settlement
- Production Planning Daily Sale based production Settlement
- Variance Report based in Recipe Vs Actual Consumption Food Costing

Simplify The Order Taking Process

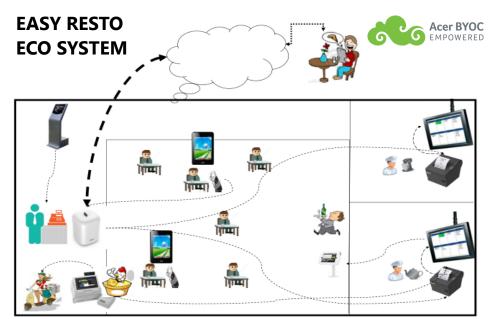

Handling Orders from the desktop machines is designed to get optimal performance and speed from both Touch and Keyboard based systems. Here are some good features supported by the same: • Multi Hall Order Taking/Monitoring in a single dashboard• Table Grouping, Split/Joint Billing . Secured Cancel/Modify options for KOT • Raise Orders with Additional information like "Less Sugar"

EASY SERVE is a tablet bases android application that can be used by stewards to take orders and manage their customers at their table directly. This ensures speedy and perfect servicing to the customers. Almost all the operations pertaining to order taking and billing can be managed from EASY SERVE.

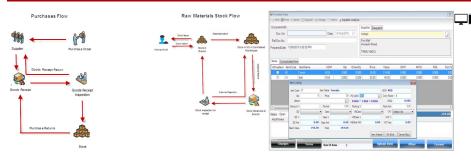

EASY PICKER is another interesting ordering option, that is highly interactive system with an e-menu systems that can be affixed on the restaurant Table from where restaurant customer can directly place Order without the intervention of a steward.

Inventory Issues Can Be Forgotten

EASY RESTO offers complete and comprehensive stock management functionalities that help with all kinds of process flow including Purchase Orders, Goods Receipt with Inspection, Purchase Returns. Here are the key features in Stock Management:

- Auto Stores Issue on Production Issue based on WEIGHTED / FIFO
- Weighing scale integrated Dispatch
- Auto Receipt on Food Dispatch
- Secured Stock Adjustment Provisions

Enhance Employee Collaboration & Team Work

Once the food is ordered, EASY RESTO informs the kitchen through a network about the order to the Kitchen/Pantry area in an instant manner that speeds Up Ordering cycle leading to MORE SATISFIED CUSTOMERS IN LESS TIME. The specialty of the RESTO is that it can handle printing in multiple kitchens also. The following options are clearly supported by RESTO while communicating with the kitchen,

Order Fulfillment

Kitchen Food Movement updates facility Once the orders are ready for delivery EASY RESTO provides options to track the items that are taken out for the delivery for both dine in and take always. In case of dine in this steward taking food for serving to the customer would be checking out the items in the kitchen
